Finastat White is an advanced anti-static agent that can increase the ability of surfaces to dissipate an electrical charge.

Finastat White is surface active and functions either by lubricating the surface against friction or by providing a relatively conductive path for the dissipation of any electrical charge.

**TYPICAL PROPERTIES**
- Appearance: White emulsion.
- Recommended Application Rate: 1 - 4%.

**APPLICATION**
Typical application areas for Finastat White include the commercial printing and textile industries.

**PACKAGING**
Finastat White is available in 25kg kegs, 200kg drums or 1000kg IBCs.
