Foamdoctor G2898 is a foam control agent based on hydrocarbons and non-ionic surfactants which can be used in a number of applications where foaming is an inherent problem.

**TYPICAL PROPERTIES**

- **Appearance:** Yellowish turbid liquid
- **Specific Gravity:** 0.85-0.9 g/cm³ @ 25°C.
- **Viscosity:** 200-800 cps @ 25°C.
- **Active Content:** 100%

**APPLICATION**

- Water based paint manufacture, emulsion polymerisation, latex, inks and coatings production.
- In paint formulations 0.2 – 0.5% of Foamdoctor G2898 is recommended. The addition of Foamdoctor G2898 can be split between the pre-grinding stage and the let down paint.
- Metalworking applications, including cutting oil formulations.
- For adhesives 0.5 – 1% based upon the weight of latex solids is usually adequate.
- Foamdoctor G2898 can be used as supplied or pre-dispersed in water.

**PACKAGING**

Foamdoctor G2898 is available in 205 litre, 1000 litre IBC containers.

**STORAGE**

After prolonged storage, slight sedimentation may occur. This does not change the performance of the product. It is recommended that the product is stirred prior to use.
